Semi-auto Capsule Filling Machine With Touch Screen Type

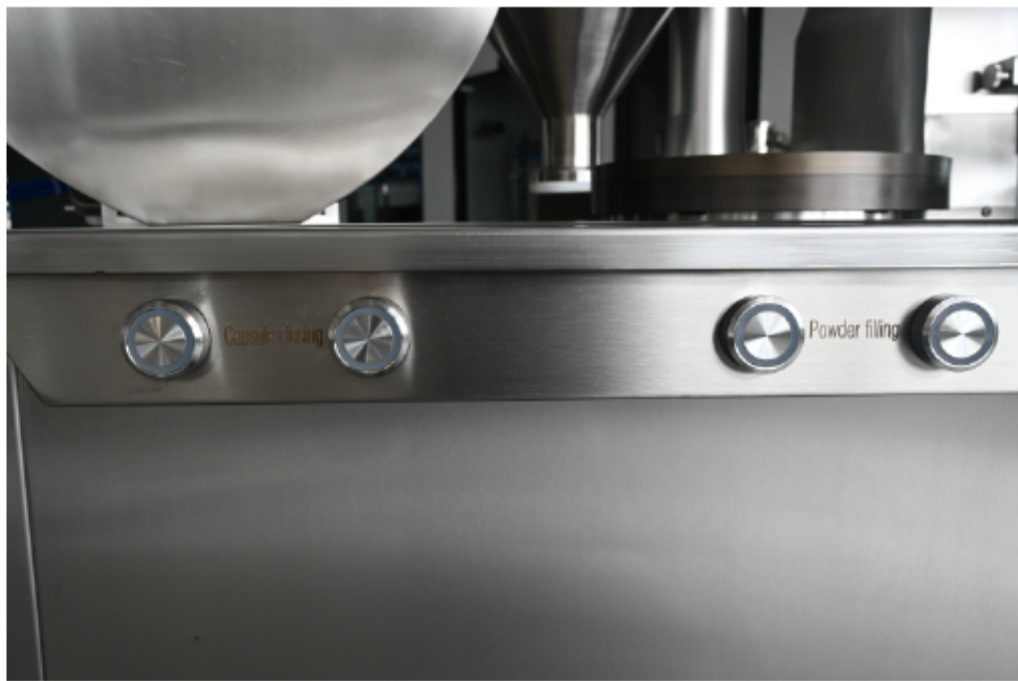

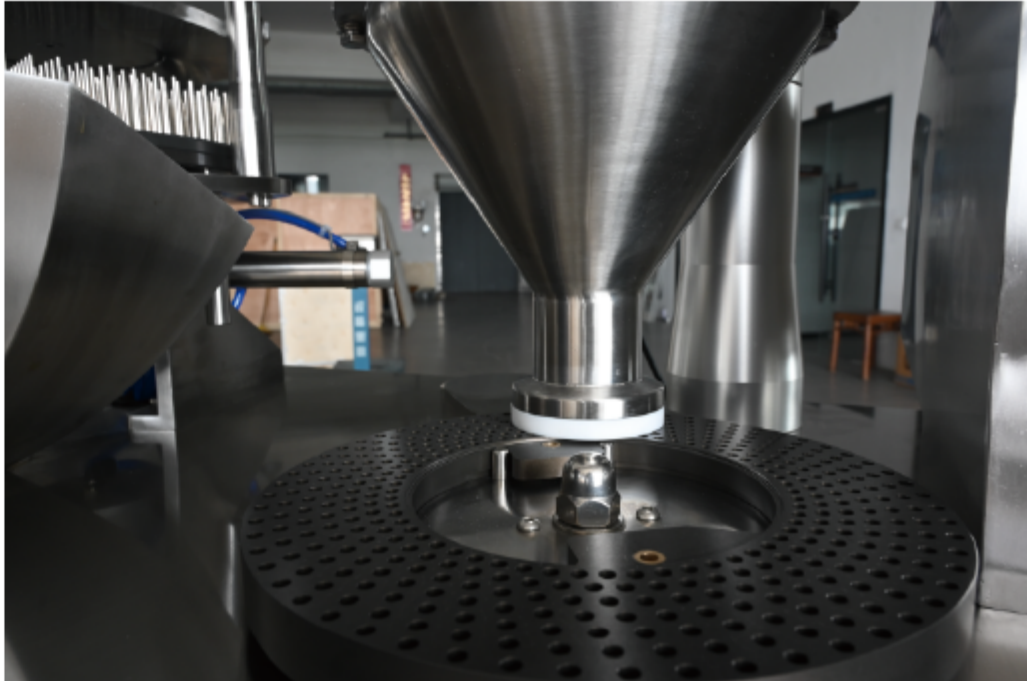

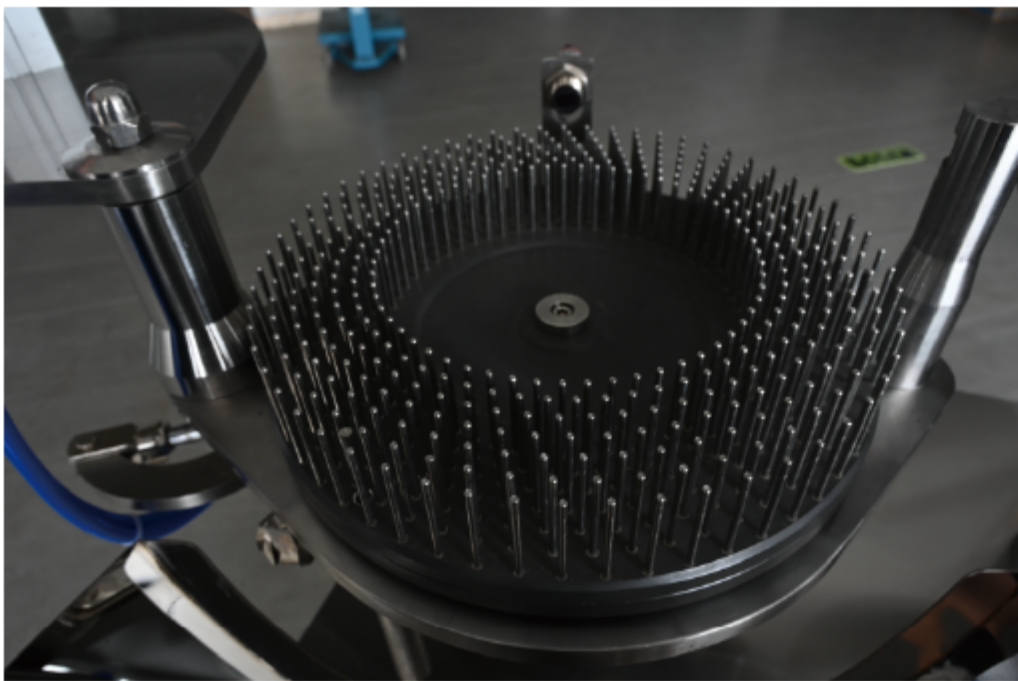

Mold

KEY FEATURES

- It integrates electrical and pneumatic controls and an automatic electronic counter in one unit.
- It can perform capsule positioning, separation, filling, and locking, replacing manual filling to reduce labor costs, and ensures accurate dosing while meeting pharmaceutical hygiene standards.
- The machine includes mechanisms for capsule feeding and orientation, powder filling device, locking, variable speed control, pneumatic and electrical systems, safety protection, and an air pump.
- It works with both soft and hard capsules, with a finished capsule rate over 97%.
- Designed for pharmaceutical factories and chemical labs.

This product is a high-efficiency, precise dual-station capsule filling machine with dual-head capsule feeding and double rotary tables. It supports synchronous or alternating operation models to boost production efficiency.

CGN208-D2 Semi-Auto Capsule Filling Machine With Touch Screen Type			
Production Capacity	25,000-30,000 Pcs per hour	Compressed Air Consumption	0.03m ³ /min 0.7Mpa
Capsule Size Application	000#、00L、00#、0L#、0#、1#、2#、3#、4#、5#	Vacuum Pump	Pumping rate 40m ³ /h
Filling Material	Pellet, capsules, hard capsule, liquid capsule, softgel	Machine Size	1140x700x1630mm(L*W*H)
	Powder without moisture	Machine Weight	400Kg
	Granules	Package Dimension	1720*870*1750mm(L*W*H)
Power Supply	Standard : 3P 380V 50Hz	Package Weight	1650*800*1450mm(L*W*H) , if need by air
	Can be Customized: 1P 220V 50/60Hz		520Kg
	Can be Customized: 3P 220V 50/60Hz		4.0 Kw
