Vertical Automatic Cartoning Machine

The TFZH-120 Vertical cartoning machine is a **high-efficiency automated cartonning device** designed for the pharmaceutical, food, cosmetics, and other industries. It uses an **advanced rotary structure for continuous and stable operation.** The machine includes an automatic feeding system, photoelectric sensors, and leaflet inspection to monitor product position and status in real time, ensuring accurate and reliable cartoning.T

Its modular design allows quick changeovers and packing different **product sizes**. It also has an energy-saving standby mode to r**educe power use**, approved **green production standards**. With stable performance and smart controls, the TFZH-80 is a great choice to boost cartonning efficiency and keep product quality, helping companies move toward automated production.

FTZH-120 Vertical Automatic Cartoning Machine			
Packing speed	50-80 Cartons/min	**Machine noise**	≤80dB
Carton size range	L(40-200)mm*W(12-100)mm*H(12-100)mm	**Air pressure**	0.5-0.8 Mpa
Carton gram requirements	135-350g/m³	**Air consumption**	150L/min
Motor power	2.5KW	**Dimension**	1590*1380*1832 mm
Power supply	Three phase 380V 50Hz	**Weight**	650Kg
