

FTZH-130»

Vertical Automatic Cartoning Machine

The FTZH-130 fully automatic cartoning machine is an upgraded version, redesigned using the newest technology to greatly improve performance. It can pack up to **120 cartons per minute** while remaining stable at high speeds. This machine is ideal for **packing medicines (blister packs) or plastic and glass bottles into cartons**. It automates the entire process, including inserting instruction leaflets and sealing carton flaps, with optional hot melt glue sealing.

FTZH-130 Vertical Automatic Cartoning Machine

Packing speed	30 – 130Cartons/min	Machine noise	< 75db
Carton size range	(65 – 155)mm×(30 – 85)mm×(15 – 50)mm	Air pressure	≥0.6Mpa
Carton gram requirements	250 – 350g/m²	Air consumption	120 – 160L/min
Motor power	0.75kw	Dimension	2300mm×1140mm×1800mm
Power supply	220V 50Hz	Weight	1200kg
