Semi-auto Capsule Filling Machine With Double Head

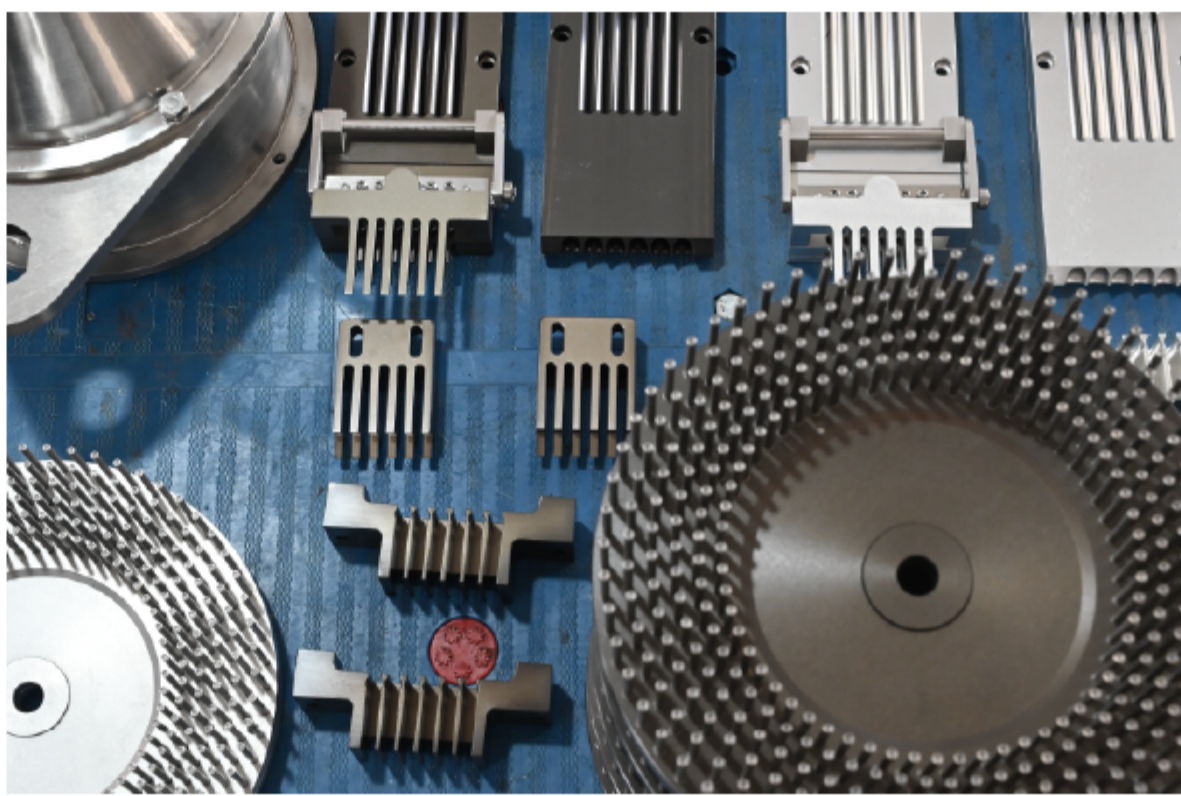

This product is a high-efficiency, precise dual-station capsule filling machine with dual-head capsule feeding and double rotary tables. It supports synchronous or alternating operation models to boost production efficiency.

KEY FEATURES

- **Mold Chamfering:** Ensures that capsules are placed correctly without any missing, and that no powder is left on the tray during filling.
- **Filling System:** The filling amount is controlled by adjustable feeding and mold rotation speeds. The dosage is accurate with an error rate within 3%. Automatic filling reduces capsule contamination and meets GMP standards.
- **Capsule Feeding Safety:** protects operators during capsule filling.
- **Electrical Components:** Electrical parts are grouped together for easy checking and maintenance.

air pump

pattern

CGN208-D3 Semi-Auto Capsule Filling Machine With Double Head			
Production Capacity	40000 pcs/h	Compressed Air Consumption	0.03m³/min 0.7Mpa
Capsule Application	000#、00L、00#、0L#、0#、1#、2#、3#、4#、5#	Vacuum Pump	Pumping rate 40m³/h
Filling Material	Pellet, soft capsules, hard capsules, liquid capsules	Machine Size	1300*800*1750(mm)
	Powder without moisture	Machine Weight	400Kg
	Granules	Package Dimension	1640*720*1700mm
Power	2.2kw	Package Weight	500Kg
Power Supply	380/220V 50Hz
